Outdoor Furniture Mounting

Here are some basic mounting options for outdoor furniture, site amenities and seating. Mounting options vary for each specific product and it's particular usage requirements.

Portable

Portable mounting requires no specific installation method and allows for the item to be re-positioned freely at anytime.

Portable Bench

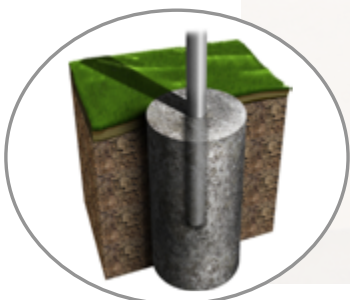

Surface Mount

Surface mounting involves bolting the item down into the flooring or surface substrate to secure in place. This method provides stability and also allows future removal or repositioning.

Surface Mount Bike Rack

In-Ground/Permanent

In-Ground mounting is a permanent installation that requires digging a hole and pouring a cement footing that encases and secures the mount into the ground.
